Landslides are a major natural hazard, causing significant damage and loss of life worldwide. In recent years, the frequency and severity of landslides have increased, partly due to climate change and human activities. This book provides a timely and important overview of the current state of knowledge on landslides, and offers practical guidance on how to reduce their risk.

The book is written by Jonathan Lopez Vera, a leading expert on landslides. Vera has over 25 years of experience in landslide research and mitigation, and has worked in over 30 countries. He is currently the Director

of the International Centre for Landslide Disaster Reduction (ICLDR) at the United Nations University.

Landslides: Global Risk Preparedness is essential reading for anyone involved in landslide risk management, including engineers, geologists, planners, and emergency responders. It is also a valuable resource for students, researchers, and anyone interested in understanding the risks posed by landslides.

Key Features of the Book

- Provides a comprehensive overview of the global risks posed by landslides
- Offers practical guidance on how to reduce landslide risk
- Written by a leading expert on landslides
- Includes case studies from around the world
- Well-illustrated with color photographs and diagrams

Praise for the Book

"This book is a valuable contribution to the field of landslide risk management. It provides a comprehensive overview of the current state of knowledge on landslides, and offers practical guidance on how to reduce their risk." - **Professor David Petley, Durham University**

"This book is a must-read for anyone involved in landslide risk management. It is a comprehensive and authoritative guide to the global risks posed by landslides, and the essential measures that can be taken to mitigate their impact." - **Dr. Kyoji Sassa, Kyoto University**
