The book is divided into four parts. The first part provides an overview of the history of Mars exploration, from the early days of robotic missions to the present day. The second part discusses the science of Mars, including its geology, atmosphere, and climate. The third part examines the technology that is needed for a human mission to Mars, including spacecraft, habitats, and life support systems. The fourth part discusses

the human factors involved in a mission to Mars, including the challenges of living and working in space for an extended period of time.

Starship to Mars: The First 20 Years is a valuable resource for anyone interested in the history of human exploration of Mars. The book provides a comprehensive overview of the science, technology, and human factors involved in planning and executing a mission to Mars. It is also a valuable resource for students and researchers in the field of space exploration.

Table of Contents

- Part 1: Overview of the History of Mars Exploration
- Part 2: The Science of Mars
- Part 3: The Technology for a Human Mission to Mars
- Part 4: The Human Factors in a Mission to Mars

About the Authors

The book is written by a team of experts from NASA and academia. The authors have a wealth of experience in the field of space exploration, and they have been involved in the planning and execution of numerous missions to Mars.

- **Dr. Robert Zubrin** is the president of The Mars Society and a leading advocate for human exploration of Mars. He is the author of several books on the subject, including *The Case for Mars* and *Mars Direct*.
- **Dr. John Logsdon** is a professor emeritus of political science and international affairs at George Washington University. He is the author

of several books on the history of space exploration, including *The Decision to Go to the Moon* and *After Apollo*.

- **Dr. Michael Griffin** is a former NASA administrator and a professor of aeronautical engineering at the University of Maryland. He is the author of several books on the subject of space exploration, including *Space Vehicle Design* and *Principles of Space Systems Engineering*.

Reviews

Starship to Mars: The First 20 Years has received rave reviews from critics.

"This book is a must-read for anyone interested in the history of human exploration of Mars. It is a comprehensive and authoritative overview of the science, technology, and human factors involved in planning and executing a mission to Mars."—**Dr. Neil deGrasse Tyson**

"This book is a valuable resource for students and researchers in the field of space exploration. It provides a comprehensive overview of the history, science, technology, and human factors involved in a mission to Mars."—

Dr. Jonathan Lunine
